

Team Performance Measurement

A 2 hour Round Table for Consultants with Dr Jill Macbryde

Would you like to help organisations develop meaningful team-based performance measurements systems?

Join us for a special round table discussion led by the foremost researcher in the area of team performance measurement, Dr Jill MacBryde.

Jill MacBryde is a Lecturer in the Department of Design Manufacture and Engineering Management, University of Strathclyde and a member of the Centre for Strategic Manufacturing.

Her teaching and research interests lie in:

- Business process improvements
- Change management
- Human centred change
- Team performance management

She is currently the principal investigator on a research project focusing on measuring team performance in business process environments.

This research project has produced a workbook for managers and consultants who wish to ensure

performance measurement systems are being used to their best effect to measure team performance, and to manage team performance by aligning reward systems with the performance measure and company strategy.

Jill's visit to Australia with Smartlink in 2000 received very positive feedback:

"Jill obviously knows her stuff. Great examples and extensive knowledge."

"Jill delivers an engaging session with ample opportunity for participation. A positive and energetic speaker."

Jill will give a short presentation followed by lively Q&A and round table discussion.

You will also be able to take away a copy of Jill's workbook and a catalogue of performance measure used in organisations worldwide.
